EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Claims:

Claim 10, line 7, change "others" to "other", insert---**layers**---

2. The following is an examiner's statement of reasons for allowance: After a review of the prior art of record, it is believed that the present invention is novel and non-obvious wherein no reference discloses a flexible tubular pipe including a plurality of helical windings, including an inner carcass comprised of a winding of a profiled strip of interlocked turns, a set of armor plies comprised of helical windings, an internal sheath outward of the carcass and a polymeric external sheath outward of the armor plies and a helical winding comprises of polytetrafluoroethylene (PTFE) tape located between the carcass and external protective sheath. Also no reference discloses a flexible tubular pipe comprising successive layers of helical windings of profiled strips, with one of the strips comprising polytetrafluoroethylene tape, wherein the tape is a long tape comprising welded together elements of shorter length of

PTFE tape and at least one sheath of polymer material provided between two other layers. The closest reference, U.S. 5,934,335 to **Hardy** discloses an internal carcass, helical armor layers, and a sheath of PTFE, but does not disclose a PTFE winding of tape. **Plumley** discloses a hose for automobile fuel line including a layer of tetrafluorethylene, but does not disclose it as being a tape, nor does it disclose an internal carcass or armoring layers. It would not be obvious to provide the tetrafluorethylene (TEFLON) layer of **Plumley** to the tubular pipe of **Hardy** because **Plumley** does not disclose the layer as a winding tape and the claimed invention requires both a helical winding of PTFE tape, as well as an internal sheath.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Patrick F. Brinson** whose telephone number is (571) 272-4897. The examiner can normally be reached on M-F 7:30-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Kevin P. Shaver** can be reached on (571) 272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
